EDUCATION

ACLC College of Butuan

Bachelor of Science in Computer Science

Butuan City, Philippines

2014 – 2019

PROFESSIONAL EXPERIENCE

City Government of Butuan

Senior Full Stack Developer

Butuan City, Philippines

May 2026 – Present

- Build the City's Human Resource Management System (CHRMS), a React front end backed by a Laravel REST API, digitizing personnel records and HR workflows across city departments.
- Own architecture decisions end to end: database schema, REST API design, and front-end delivery.
- Partner with HR and department stakeholders to translate manual government processes into digital workflows.

Engtech Global Solutions Inc.

Application Architect

Butuan City, Philippines

October 2024 – February 2026

- Architected scalable application structures for educational and enterprise clients, setting standards for maintainability, performance, and modern web practices.
- Reviewed technical designs across concurrent client projects prior to implementation.

Senior Web Developer

2022 – October 2024

- Rebuilt and maintained corporate websites for Engtech Global Solutions and ACLC College of Butuan, improving responsiveness and user experience.
- Delivered backend logic, front-end interfaces, and database integrations in PHP, Laravel, and JavaScript.

Junior Web Developer

2019 – 2022

- Built and maintained School Management System modules for ACLC College of Butuan spanning enrollment, grading, academic advising, and accounting verification.
- Promoted twice in five years, advancing from junior developer to application architect.

ACLC College of Butuan

Part-Time Instructor

Butuan City, Philippines

2019 – April 2021

- Taught IT and programming courses at Mindanao's leading IT institution, mentoring students on web development fundamentals and applied project work.

Student Assistant

2014 – July 2019

- Supported campus IT operations while completing degree, gaining hands-on exposure to production educational systems.

Independent Consulting

Freelance Web Developer

Butuan City, Philippines

2020 – Present

- Deliver custom full-stack web solutions and maintain ongoing client projects alongside full-time work.

SELECTED PROJECTS

- Altera Barangay / City App — local government administration platform for barangay and city-level records.
- Sigma Accounting System — accounting and financial verification system built for institutional use.
- Algorand Pera Wallet Integration — Web3 wallet integration on the Algorand blockchain.
- Empathy Video Call App — real-time video calling application; Woosoo Web App; School Grading System.
